Most Wanted Components 2023

Karan Acoustics Master Collection POWERa Dual Mono Stereo Amplifier (\$53,000): The state-of-the-art Karan Acoustics POWERa produces a powerful 650-watts into 8 Ohm in Class-A design. They don't run hot like traditional Class-A amplifiers, which run at a constant high bias. Cleverly, the POWERa utilizes sliding Class-A bias circuits. The bias level is adjusted based on the signal in real-time.

The POWERa produced an enormous soundstage with realistic dynamic swings. From pianissimo to fortissimo, the system handled it all with remarkable realism. The POWERa can capture the full sweetness, warmth, and complexity of any orchestra's dynamic range in a manner that is second to none. *(Key Kim)*
